1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 97/45476 Choudhery.

Choudhery discloses the instantly claimed method at the abstract; page 2, lines 26-28; page 3, lines 1-27; and page 4, lines 1-10. The uncrosslinked polymer is expected to have the limitations of the instant claim 5 inherently so that it can react with crosslinker at a later stage as solid polymer will not move freely enough to react sufficiently with the crosslinker. See the molecular weights of the paragraph bridging pages 6-7 and note the definition of viscosity average molecular weight also. Page 6, lines 13-21 falls within the scope of the instant claim 6. Pages 6-10 encompass the instant claims 7-12. Page 11, lines 21-23 falls within the scope of the instant claims 13-15.

4. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 97/45476 Choudhery.

Choudhery discloses the instantly claimed method at the abstract; page 2, lines 26-28; page 3, lines 1-27; and page 4, lines 1-10. The uncrosslinked polymer is expected to have the limitations of the instant claim 5 inherently so that it can react with crosslinker at a later stage as solid polymer will not move freely enough to react sufficiently with the crosslinker. See the molecular weights of the paragraph bridging pages 6-7 and note the definition of viscosity average molecular weight also. Page 6, lines 13-21 falls within the scope of the instant claim 6. Pages 6-10 encompass the instant claims 7-12. Page 11, lines 21-23 falls within the scope of the instant claims 13-15. It would have been obvious to one of ordinary skill in the art to perform the instantly claimed method because it is encompassed by Choudhery and would have been expected to give the benefits disclosed by Choudhery.
